Professional Title

- Data Engineer | Python | SQL | Azure | ETL | Power BI | PySpark

Objective

Results-driven Data Engineer with 2 years of experience in ETL pipelines, Python, SQL, Azure Data Factory, PySpark, Power BI, and data warehousing. Skilled in data transformation, cloud technologies, database management, and analytics. Seeking to leverage expertise in scalable data solutions, automation, and business intelligence to contribute to organizational growth.

Education

- Savitribai Phule Pune University2024
BSc Computer Science
A Grade

Skills

- Python
- SQL
- ETL Pipeline
- Azure Data Factory
- Pyspark
- Apache Spark
- Power BI
- Data Warehousing
- MongoDB
- REST API Integration

Experience

- Alivelu EnterprisesApril 2024 - Present
Data Engineer
 - Developed scalable ETL pipelines using Python, SQL, Azure Data Factory, and PySpark for efficient data processing and transformation.
 - Performed data extraction, cleansing, loading, and data warehousing from structured and unstructured data sources.
 - Optimized SQL queries, managed MySQL/MongoDB databases, and integrated REST APIs for backend data workflows.
 - Created Power BI dashboards and analytics reports to support business intelligence and data-driven decision-making.
 - Collaborated in Agile/Scrum environments using Git/GitHub while handling debugging, testing, deployment, and production support.

Projects

- **ETL Data Pipeline System**

Technologies Used : Python, SQL, Azure Data Factory, Power BI

Built an ETL pipeline using Python and SQL to extract data from APIs and databases, transform data, and load it into centralized storage systems. Automated workflows and developed Power BI dashboards for business reporting and analytics.

- **Sales Analytics Dashboard**

Technologies Used: Power BI, SQL, Python, Excel.

Developed a business analytics dashboard using Power BI and SQL to visualize sales performance, customer insights, and operational KPIs. Improved reporting accuracy and data accessibility for business users.
